BIOS

Gathering different materials and including multiple formal solutions, the works of Ricardo Rendón act as a complex diary where the actions are registered, documented and accumulated. In this sense, a sheet of paper, a wood board or the exhibition space is transformed into a setting determined by the creative experience, an ambient where the work is presented as a fact and evidence of the creative execution.

The works of Ricardo Rendón are an appendix of construction or destruction practices that enunciate the moment where things happen, forms that propose the action as leitmotiv. David Miranda, Museo Experimental El Eco. 2007.

"In his works, Ricardo Rendón proposes a renaissance in reverse that emphasizes manual work, and exposes the worker face of conceptual art, that which values the process and the singularity of each gesture. Rendon demonstrates the metaphysics of things in the things themselves, it is within the work, in that which can be seen and touched, and in its process of creation, that the thought generated by the work remains".

Paula Braga, São Paulo 2013.

Ricardo Rendón (Mexico City 1970) has achieved several international awards and recognitions, his works have been exhibited at the Reina Sofia Museum, Kunstlerhaus Bethanien, Videobrasil, Videolisboa, UCSD University Art Gallery, Maison Rouge in Paris, Museo Experimental El Eco, Museo Tamayo, MUAC Museo Universitario de Arte Contemporáneo, Museo de Arte Carrillo Gil, Museo de Arte Moderno and Laboratorio Arte Alameda in Mexico City. His work is part of important contemporary art collections such as the Cisneros Fontanals Art Foundation CIFO, Sayago & Pardon Collection, The Bank of America, La Colección Jumex, the Isabel & Agustín Coppel Collection, Fondation Daniel Langlois and MUAC Museo Universitario de Arte Contemporáneo.
